

You Can Rely On Horizon Rollers For High Performance

ALUMINIUM ROLLERS

TROUGH, VEE & FLAT RETURN ROLLERS

The Aluminium roller has been designed to be very strong & lightweight. The bearing housings are constructed from glass reinforced nylon and also incorporates a moulded-in copper electrostatic discharge wire which connects the roller shell to the bearing.

Fitting heavy steel return rollers can be a huge health & safety problem, which could cause unnecessary injuries to site personnel.

All rollers are fitted with steel shafts and sealed greased for life bearings.

Seals are multi labyrinth c/w bearing lip seal

Benefits

- **Lightweight**
- **Strong**
- **Non Magnetic**
(For use under magnets)
- **Reduced Noise**
